

BEST® Built-In Ventilation Selection Guide

Quiet, Flexible
Performance
Bringing Custom
Designs to Life

BEST® is your built-in solution for every installation...

At BEST, we believe nothing should stand in the way of your designs. That's the great advantage of our built-in range hoods. Large or compact, a built-in hood means design flexibility that will work with custom cabinetry, unique enclosures or challenging spaces. BEST leads the industry with the broadest line of built-in hoods in all shapes, sizes and performance options. So, regardless of your personal design style or cooking style, you'll find the perfect BEST model to fit any kitchen.

Depending on your local codes and standards, all of our indoor products are designed to work with make-up air dampers. Many of them are compatible for remote control operation.

BEST is the only range hood manufacturer with the right ventilation solution for your unique installation, kitchen design or cooking style. Just look at all the choices!

P195P

The P195P features perimeter draw to deliver better capture, while it fits within a shallow 12" deep cabinet. Optional non-duct capability—an industry exclusive! A smooth stainless panel conceals the filters and lends a contemporary flair.

See the dramatic capture in this real life test.

P195ES

ENERGY STAR® rated when ducted to the exterior. The 370 CFM power will quietly clear the kitchen of smoke and odors, yet still fall below most make-up air code requirements. Fluorescent lighting ensures total energy savings.

PK22

The PK22 is the first range hood to be powered by the patent pending iQ Blower System™—giving you the quietest operation, greatest energy efficiency and fastest smoke and odor removal than any other blower in its class.

CP

The CP Series hood inserts offer several sizes, two depths and a full range of internal or external blower choices, including iQ. The all-in-one design means the integrated liner lets you flush mount this hood for a rare combination of beauty and power.

PIK

PIK is a professional style power pack that provides many choices of internal or external blowers. It also has the convenience of remote control with the optional wall-mounted control. And like all BEST power packs it works with liner accessories that allow up to 60" in width.

CPD

The CPD Outdoor hood insert has an integrated liner to simplify installation and provide a finished look to any custom hood. Designed with the power needed to handle grilling—and corrosion resistance to survive the outdoor environment.

Style	Standard Wood	Custom Mantle	Wall-Mount/Freestanding Custom
Recommended Hood	P195ES, P195P, CP3	PK22, PIK, CP3, CP5	PK22, CP3, CP5

Match the style of your installation with the right BEST range hood.

P195P

P195P fits 12" deep cabinets. Perfect for cabinet-mount applications because of their smaller profile and available liners which can be used with standard cabinet sizes. Uses Perimeter aspiration that provides superior capture over conventional filter designs. Shown in flush cabinet design. Optional ACR2 remote control; non-duct capable.

Depth	Widths	Application Width	Blower Type	MUAD	Optional Liners
11-1/8"	21-3/16" 28-9/16"	24-48"	HP Internal Pro600 or SuperPro1200*	MD6T/TU MD8T/TU	Y

*Industry Exclusive in shallow depth

P195ES

P195ES fits 12" deep cabinets. Perfect for cabinet-mount applications because of their smaller profile and available liners which can be used with standard cabinet sizes. ENERGY STAR® rated when ducted out. Includes dual fluorescent lighting, energy efficient motor; non-duct capable.

Depth	Widths	Application Width	Blower Type	MUAD	Optional Liners
11-1/4"	27-1/2"	24-48"	HP Internal 370 CFM	MD6TU MD8TU	Y

PK22

An Industry first using the iQ12 Blower makes the PK22 the quietest in its class. Designed for high performance applications, perfect for large mantel designs. Features mesh lined Hi-Flow™ baffle filters for superior grease capture. Industry Exclusive 1200 CFM in 30" width. Optional liners and ambient light panel accessories; Optional ACR2 remote control.

Depth	Widths	Application Width	Blower Type	MUAD	Optional Liners
15-7/16"	27-3/4" 36-1/2"*** 43-7/16"***	30-60"	iQ12 with GPS; External option 280-1500 CFM	MD6TU MD8TU	Y

**External blower models available.

BEST® Offers the Broadest Choice in Blowers

The BEST® iQ Blower System™

Internal Blower technology that surpasses all other range hoods in performance, sound and energy use.

Range hood styles, materials and finishes have changed dramatically over the years, but blower technology has largely remained the same. Never before has there been a blower system built to embody quiet flow design, intelligent operation, and digital motor technology in one package—delivering superior sound, power, and energy efficiency. BEST listened and took the lead.

- Up to 2X Quieter Operation
- Up to 30% Faster Smoke & Odor Removal
- Up to 22X More Energy Efficient

See the difference at BestRangeHoods.com and click the iQ Blower System message to watch BEST beat the competition!

BEST® High Pressure Blowers

BEST High Pressure (HP) blowers provide exceptional performance by incorporating a unique high-flow design into the housing and wheel. As a result, HP blowers are able to push more air through long duct runs to clear the air faster than the competition.

Internal Blowers

Internal blowers make installation fast and easy. You can even make the choice for recirculation. These blowers are fitted to the range hood for comfortable sound levels and include backdraft dampers. They're made of all metal housing for durable, long-lasting operation and to meet the needs of high performance cooking.

Internal blowers may be vented through the roof or wall, with the goal of minimizing the duct length.

Internal blowers reside within the hood structure, so only a single electrical connection is required.

Internal				
Blower	P5	P6/ iQ6	P8	P12/ iQ12
Vert. CFM	460	600	850	1200

External Blowers

External blowers reduce kitchen sound levels by moving the blower mechanism away from the point of use. In-line blowers can be located in the attic. Exterior are located on the outside of the home. Both can be vented through the roof or wall and include dampers. Durable sealed housings meet the rigorous needs of professional style cooktops and ranges. All External blowers offer a choice of power so you can select the CFM that is right for your cooking needs and maintain peace in the kitchen.

In-Line Blowers

Best® In-line blowers are installed between the point of use and the duct termination point. In-line blowers may be installed in an attic space, utility room or crawl space.

In-line blowers may be vented through the roof or wall, with the goal of minimizing the duct length.

Electrical connections to both the hood and the in-line blower are required.

In-line				
Blower	ILB3	ILB6	ILB9	ILB11
Max. CFM	280	600	800	1100

Exterior Blowers

Best® exterior blowers are installed at the duct termination point (roof or exterior wall), providing the greatest distance between the point of use and the blower.

Exterior blowers may be vented through the roof or wall, with the goal of minimizing sharp turns in the duct that can impede airflow.

Electrical connections to both the hood and the exterior blower are required.

Exterior				
Blower	EB6	EB9	EB12	EB15
Max. CFM	600	900	1200	1500

BEST® Liners & Ambient Light Panels

BEST Liners provide a beautiful way to finish your custom hood and protect your cabinetry. Designed to work with BEST Power Packs, liners feature a 3" adjustable nose to provide application flexibility, and a 4" height for excellent capture.

To highlight the beauty of your cooking appliance, our optional ambient lighting panel is a perfect addition. It works with your under-cabinet lighting, and can be added to any BEST liner.

30", 36" and 42" light panels feature two lights. 48", 54" and 60" light panels feature three lights. (Bulb type 120V, GU10-50W Halogen, included.)
